

Specialised System Components for Flour Milling Plants

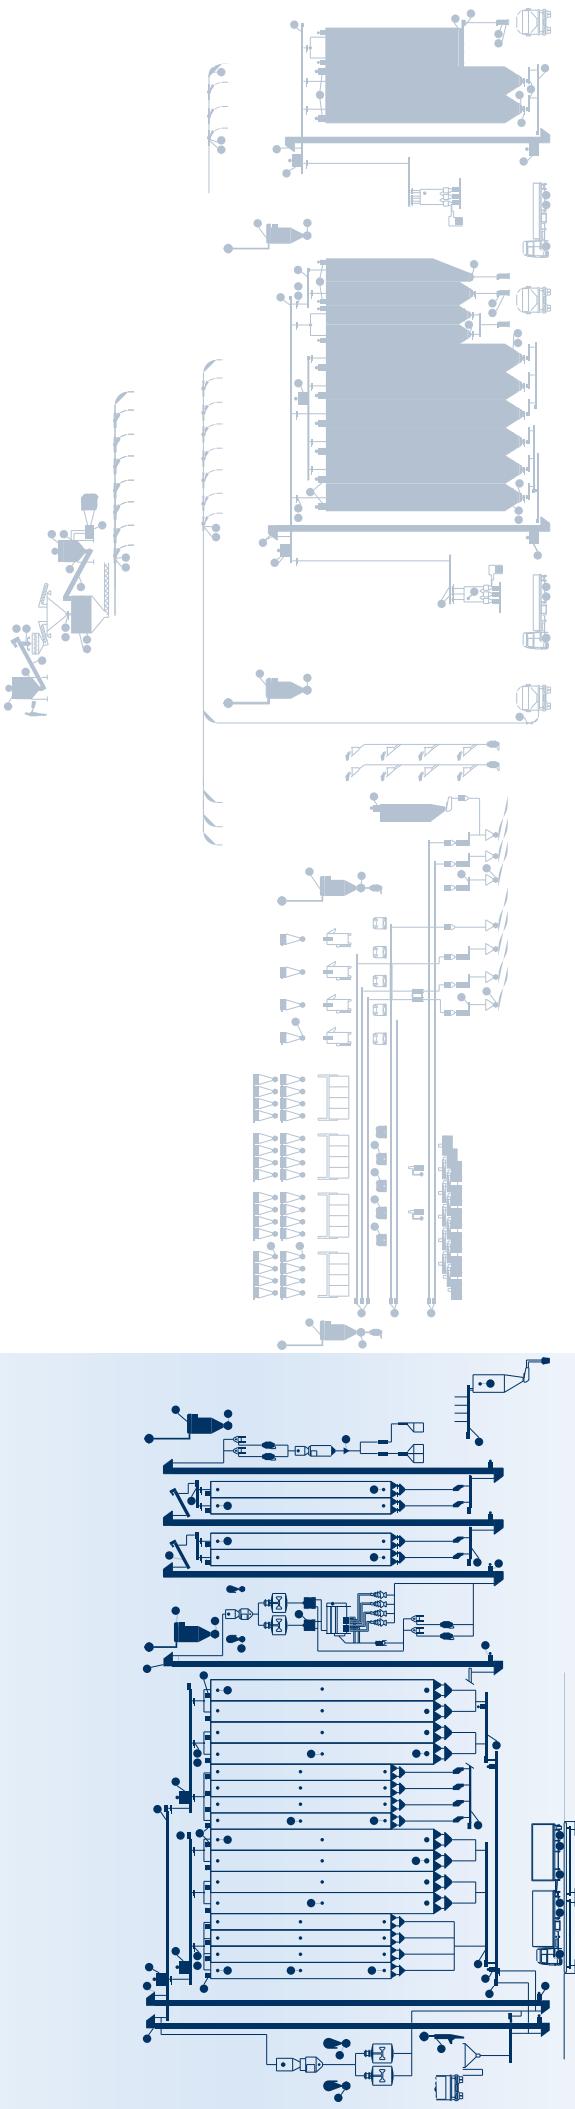

Flour Milling

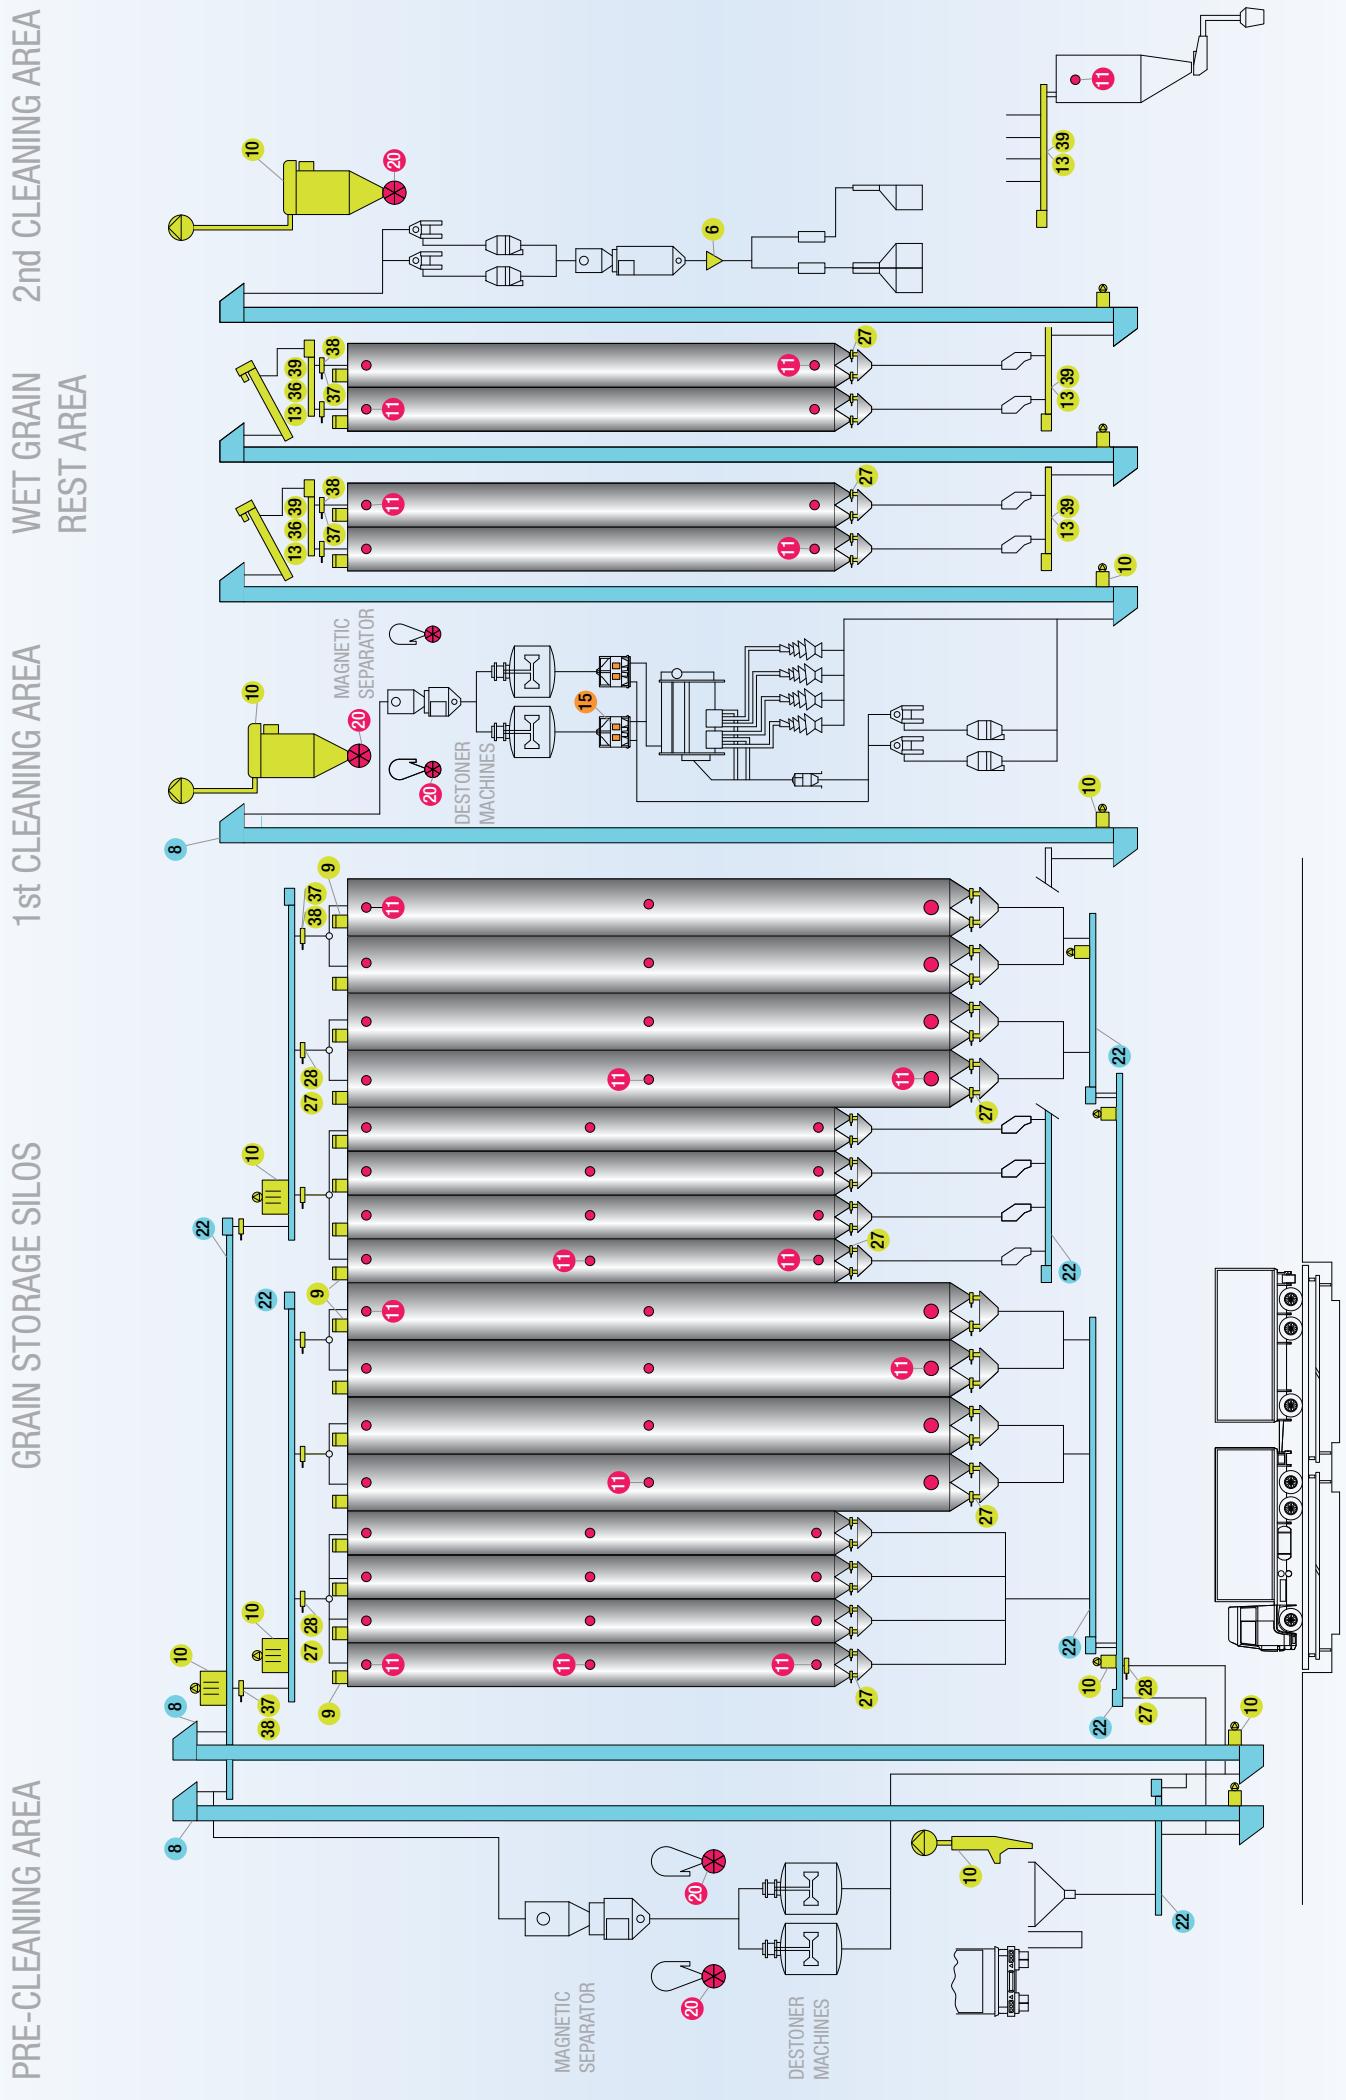

Flour Milling

RAW MATERIAL STORAGE

Cereals on arrival at the plant are collected in big silos or cells.
Different steps of cleaning and conditioning ensure the cereals will
be ready for the milling process with the right moisture content.

WAMGROUP® offers specialised system components tailored to the specific requirements of project engineers of flour milling plants.
By selecting this specialised equipment, system designers have the assurance they will combine top quality and performance with the highest possible operating efficiency.

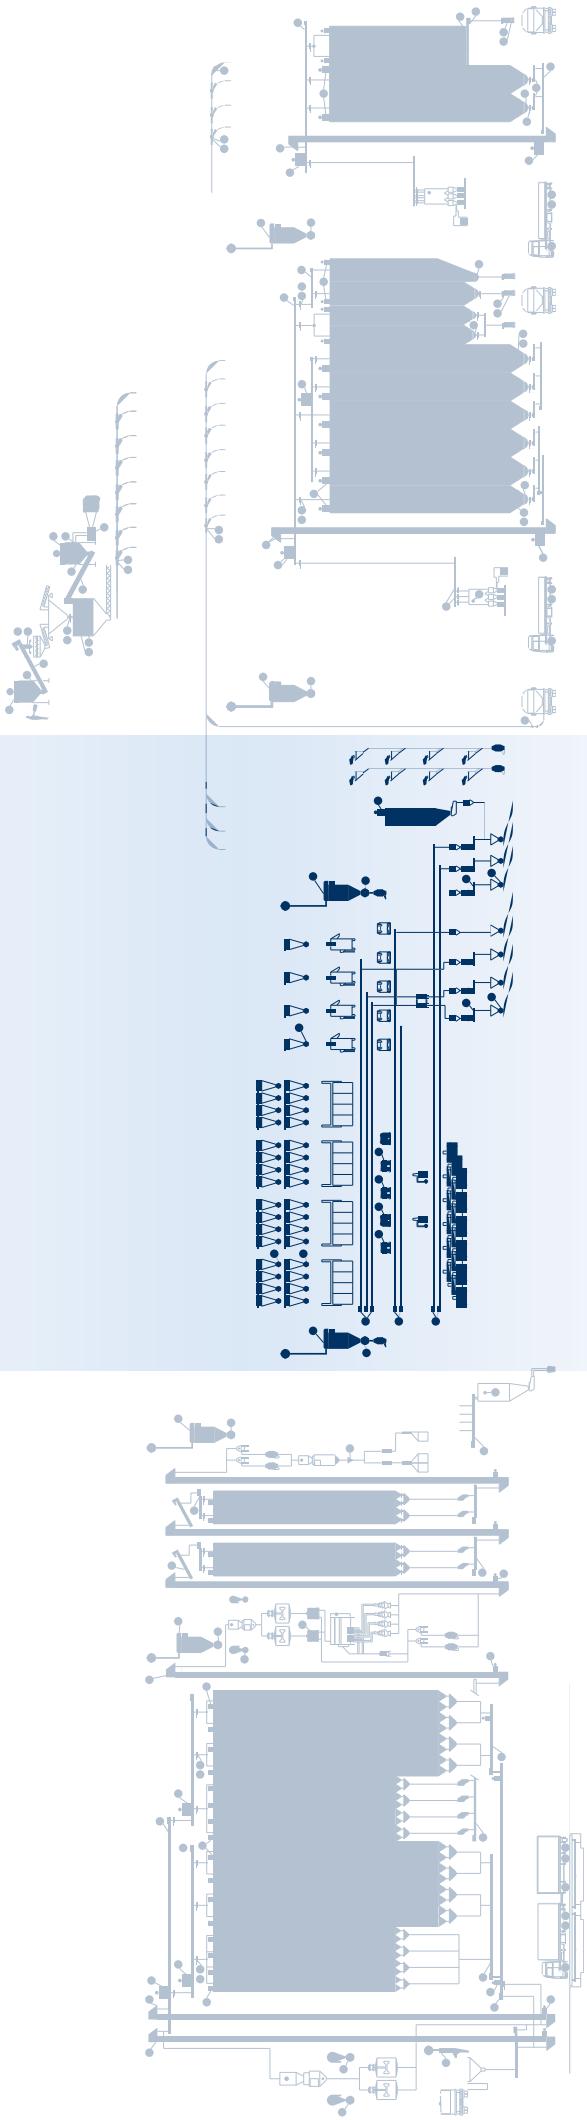

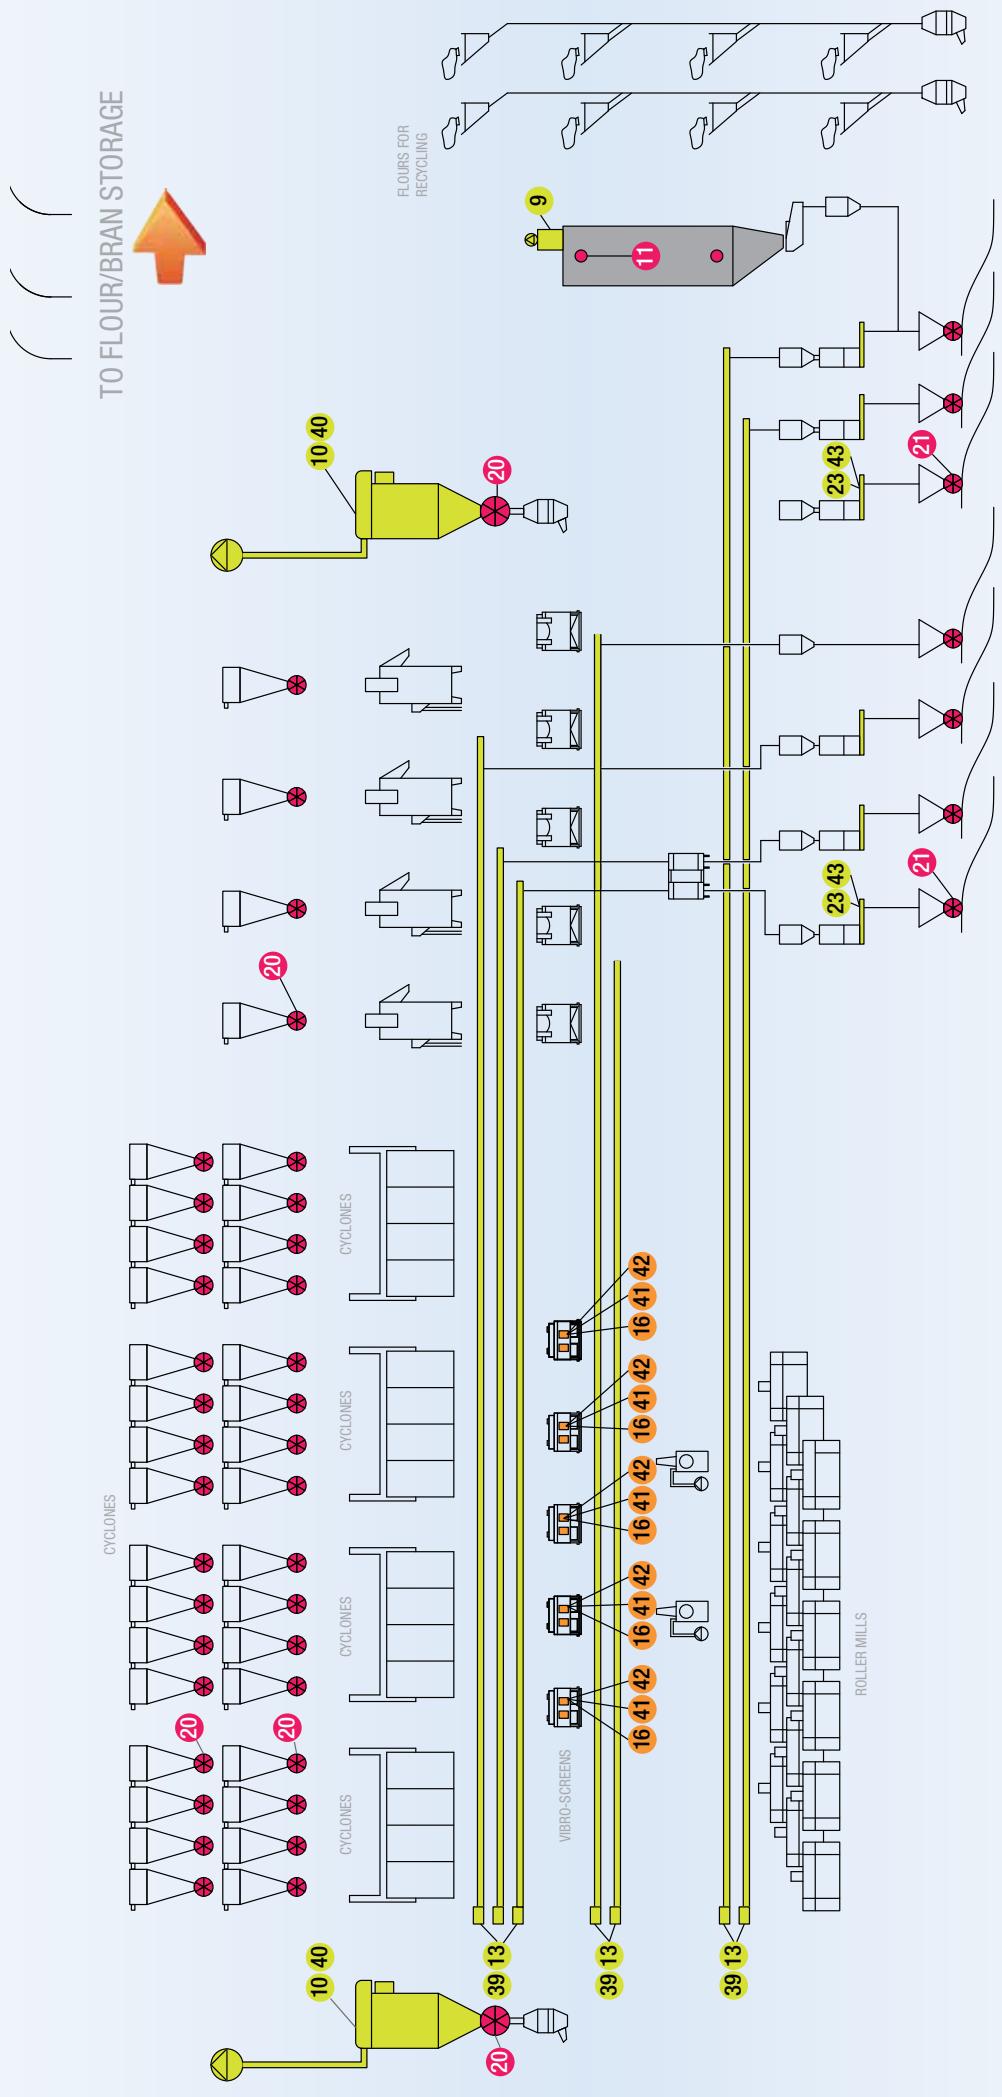

MILLING & SCREENING

This is the core of the plant: Cereals are milled to extract the flour from the husk. Several mills and sieves produce flours in different particle size and purity.

WAMGROUP® offers specialised system components tailored to the specific requirements of project engineers of flour milling plants. By selecting this specialised equipment, system designers have the assurance they will combine top quality and performance with the highest possible operating efficiency.

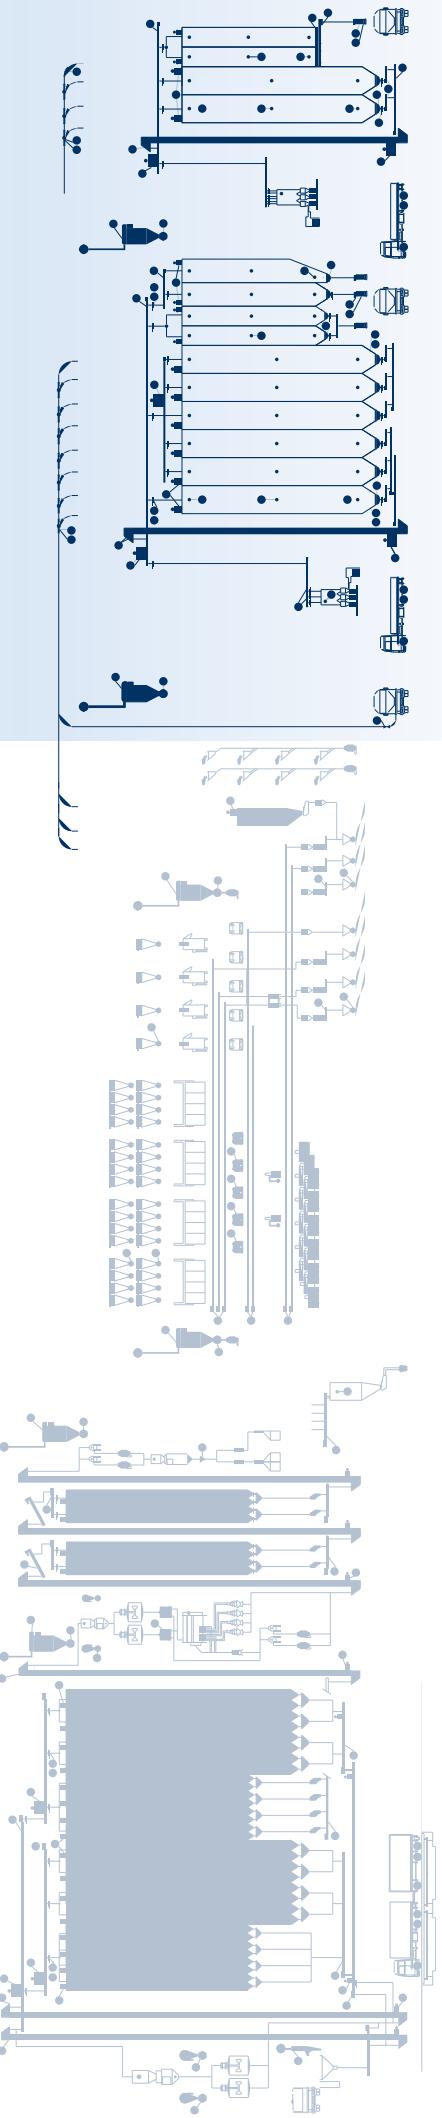

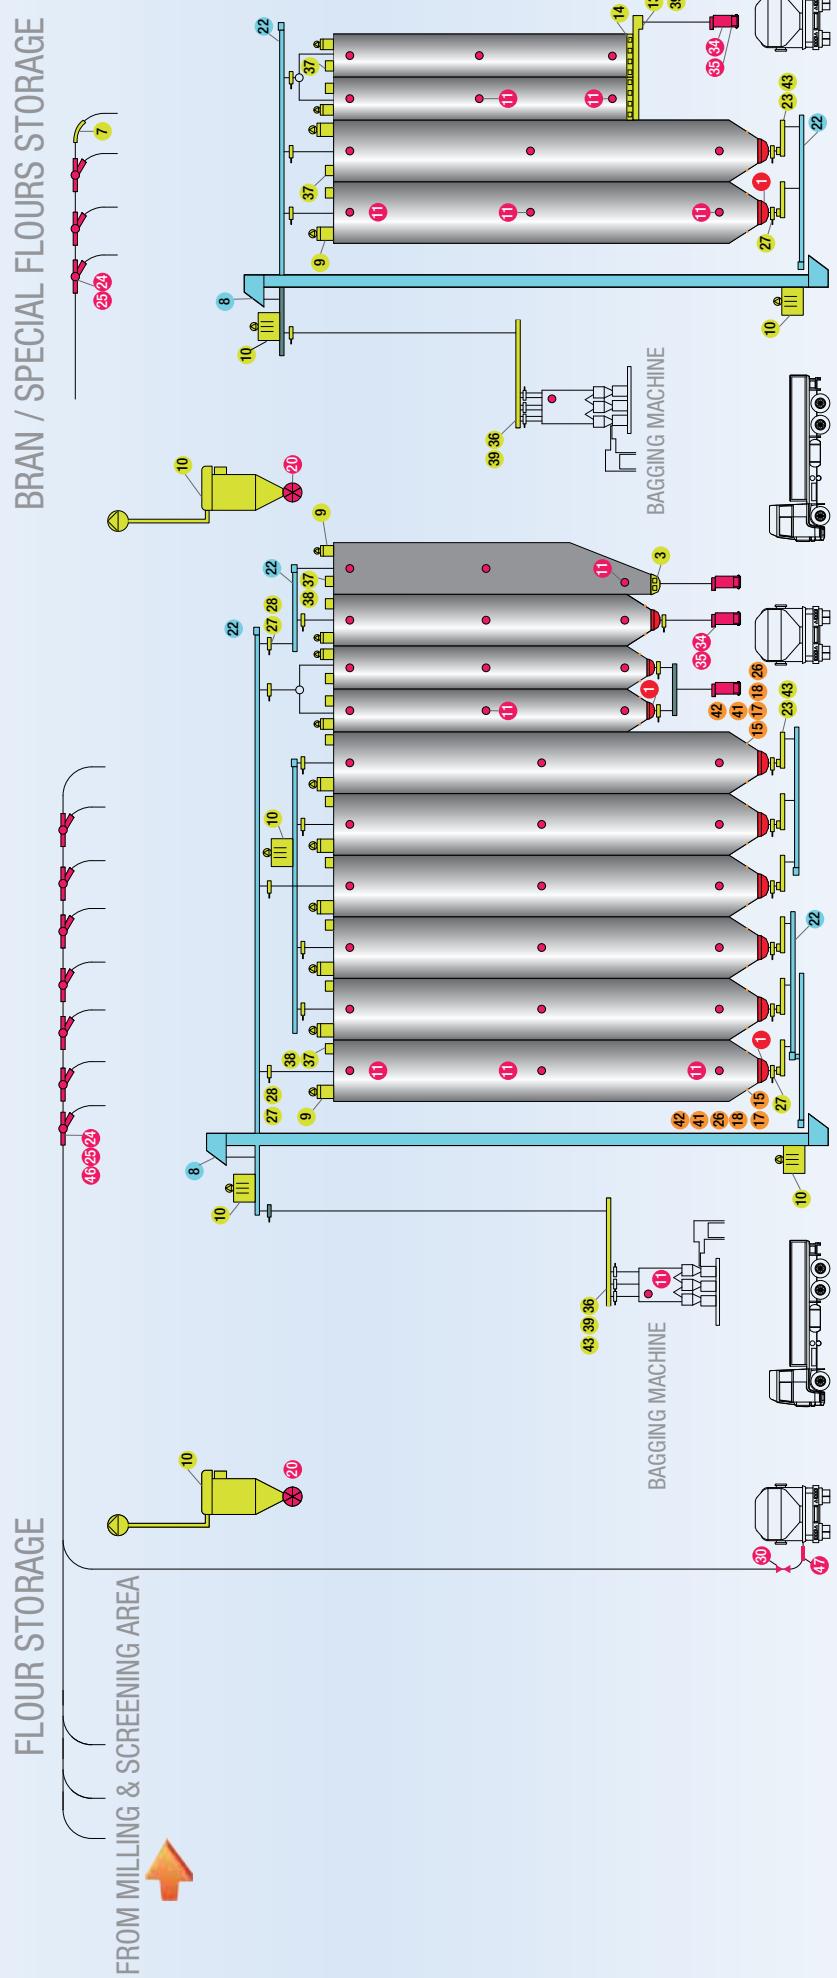

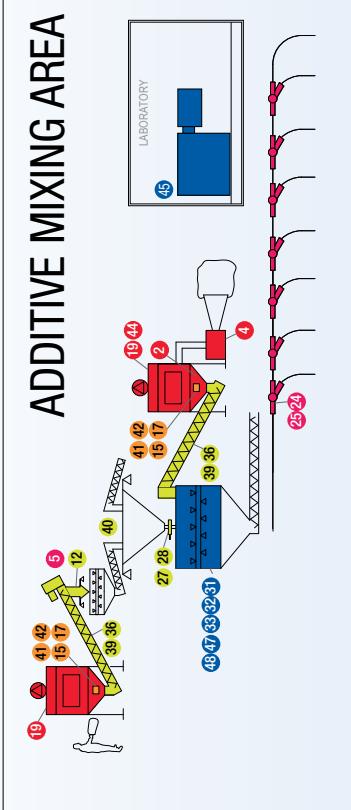

FLOUR/BRAN STORAGE

WAMGROUP® offers specialised system components tailored to the specific requirements of project engineers of flour milling plants. By selecting this specialised equipment, system designers have the assurance they will combine top quality and performance with the highest possible operating efficiency.

Classified milled flours and by-products are conveyed in this area to be stored in silos or cells to be then distributed to the market. In that area flours are discharged from silos to be packed into bags or loaded into tankers for bulk delivery.

To obtain products with specific properties, flours can be also mixed with other ingredients (additives, vitamins,...) before being packed or stored again.

1	Bin Activators BA-210 BAEK-210  Mass flow discharge	13	Trough Screw Conveyors MSC  Easy access for cleaning
2	BINSWEEP® Rotary Dischargers BSN  Height-saving discharge	14	Live Bin Bottoms MU  Ideal for discharging bran or middlings
3	Tapered Twin Shaft Screw Feeders BU  Mass flow discharging & feeding	15	External Electric Vibrators MVE  ATEX zone 22-compliant
4	Waste Bag Compactors COM  Clean work environment & operator safety	16	External Electric Vibrators MVE-210 (8-10 poles)  Specialised version
5	Loss-In-Weight Screw Feeders DCC  Highly reliable and easy to clean	17	External Pneumatic Vibrators OT-Type  Durable
6	Divertor Valves DVIA  Dustproof	18	MARTSHOCK Pneumatic Hammers PS  High impact force
7	EXTRABEND® & EXTRACURVE® Pipe Elbows  Abrasion-resistant lightweight design	19	Manual Bag Openers RSM-210 - RSMX-210  Minimum-residue design
8	Bucket Elevators EF-EC  Zone 22-compliant	20	Drop-Through Rotary Valves RV/RVR  Versatile in all applications
9	WAMELO® Dust Collectors FN-210 and FNX-210  Compliant with ATEX and latest health & safety standards	21	Blow-Through Rotary Valves RVS  Easy access to internal parts
10	WAMAIR® Dust Collectors FP-210 / FPX-210  Maintenance-friendly	22	Chain Conveyors TCG  Sturdy design
11	Rotary Level Indicators LLT  Easy to install	23	Tapered Single-Shaft Screw Feeders JUM  Minimum-residue design
12	Micro-Batch Feeders MBF-210  Process reliability	24	Divertor Valves VAD  Easy to install, compact design
13	Trough Screw Conveyors MSC  Easy access for cleaning	25	Divertor Valves VAR  Contamination-free
14	Live Bin Bottoms MU  Ideal for discharging bran or middlings	26	Vibrating Bin Aerators VB  For all powdery materials
15	External Electric Vibrators MVE  ATEX zone 22-compliant	27	Butterfly Valves VFS  Maintenance-friendly; limited number of components
16	External Electric Vibrators MVE-210 (8-10 poles)  Specialised version	28	Slide Valves VG  High flow rates
17	External Pneumatic Vibrators OT-Type  Durable	29	Slide Valves VL  No seal adjustment required
18	MARTSHOCK Pneumatic Hammers PS  High impact force	30	Pinch Valves VM  Easy sleeve replacement
19	Manual Bag Openers RSM-210 - RSMX-210  Minimum-residue design	31	Batch-Type Single Shaft Mixers with Bomb  Boy Discharge WBM Short mixing and discharge time
20	Drop-Through Rotary Valves RV/RVR  Versatile in all applications	32	Continuous Single Shaft Mixers WAH  High productivity
21	Blow-Through Rotary Valves RVS  Easy access to internal parts	33	Ribbon Blenders WBN  Gentle blending
22	Chain Conveyors TCG  Sturdy design	34	BELLOFF® Tanker Loading Bellows ZA  Built-in low-profile dust collector
23	Tapered Single-Shaft Screw Feeders JUM  Minimum-residue design	35	Tanker Loading Bellows ZG  No waste material during loading
24	Divertor Valves VAD  Easy to install, compact design	36	Tubular Trough Screw Conveyors & Feeders CAO  Minimum-residue design
25	Divertor Valves VAR  Contamination-free	37	VCP Spring-Loaded Pressure Relief Valves  Maximum work safety; ATEX zone 21-certified
26	Vibrating Bin Aerators VB  For all powdery materials	38	VHS Spring-Loaded Pressure Relief Valves  Maximum work safety
27	Butterfly Valves VFS  Maintenance-friendly; limited number of components	39	Trough Screw Conveyors CA  Sturdy design
28	Slide Valves VG  High flow rates	40	HOPPERJET® Hopper Venting Filters  Maintenance-friendly
29	Slide Valves VL  No seal adjustment required	41	External Pneumatic Vibrators S-Type  Reliable
30	Pinch Valves VM  Easy sleeve replacement	42	External Pneumatic Vibrators P-Type  High impact force
31	Batch-Type Single Shaft Mixers with Bomb  Boy Discharge WBM Short mixing and discharge time	43	Single Shaft Screw Feeders SU  Efficient material extraction
32	Continuous Single Shaft Mixers WAH  High productivity	44	FIBC Dischargers SBB  Easy bulk bag handling
33	Ribbon Blenders WBN  Gentle blending	45	Laboratory Mixer MLH  Feasibility testing and small-scale production
34	BELLOFF® Tanker Loading Bellows ZA  Built-in low-profile dust collector	46	Divertor Valves VAB  Compact and versatile
35	Tanker Loading Bellows ZG  No waste material during loading	47	Silo Safety System KCS  Process reliability
